

## Integrated Quality & Environmental Policy Ref: PO-A-9-1

---

A J Wells & Sons Ltd, was founded in 1972 and is a privately owned, family controlled, British company that specialises in the design and manufacture of high quality stoves; manufactures vitreous enamel products and imports fair trade tiles and pumice chimney. Run by second and third generations of the family, we are dedicated to providing products of enduring design and of the highest quality.

Collectively we take seriously our commitments to our customers and other stakeholders with regard to the quality and reliability we offer and also our commitment to being a socially responsible organisation with respect to our actions on the environment.

As a result we have established an integrated management system that focuses on both quality and environmental management and applies, as a catalyst, the international standards ISO 9001 for quality and ISO 14001 to address environmental controls.

This policy identifies the intent of the business in realising the integrated management system and is supported by arrangements that will

- Ensure compliance with legal and other requirements we subscribe to
- Identify objectives relevant to both quality and environmental management
- Determine controls that will prevent the significant impacts of our activities resulting in pollution.

The Integrated Management system is communicated to our employees, people working for or on behalf of the organisation and other interested parties on request.

A J Wells & Sons Limited are committed to continually improving the IMS through a programme of management audits and reviews.
